Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Arguments

Applicant's arguments with respect to claims 1 – 6 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 – 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Chen et al (US 6,492,574).

With reference to claims 1 – 5, Chen et al. disclose an absorbent article comprising an outer cover, a liquid permeable bodyside liner that defines a bodyfacing surface and that is connected in a superposed relation to the outer cover, an absorbent body that is located between the bodyside liner and the outer cover and a composition on at least a portion of the bodyfacing surface of the bodyside liner wherein the composition has a Tangent Delta value of from about 0.10 to about 0.65 measured over a temperature range of 35 to 40 degrees Celsius according to a Tangent Delta Measurement Procedure set forth in col. 18, lines 25 – 35; col. 31, line 52 to col. 32, line 6.

The examiner contends that Chen et al. disclose the specifics of the composition thereby providing a composition that will yield similar results when subjected to the Tangent Delta Measurement Procedure.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Chen et al. (US 6,492,574).

The difference between Chen et al. and claim 6 is the provision that specific amounts of the materials are used.

It would have been obvious to one of ordinary skill in the art to modify the amount of materials used in order to determine the most effective product since it has been held that determining the where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable range involves only a level of ordinary skill in the art.
